

Answers your AI can use, not raw rows.

Federal market intelligence for Claude and any MCP client: budgets, contracts, opportunities, protests and programs, linked.

THE PROBLEM

Raw federal data makes an AI confidently wrong.

One company, hundreds of records

A prime is many registrations. Raw rows count each one alone.

Agencies stop at the top

You sell to an office. The public spending API stops at the department.

Notices, not opportunities

No value, no award date, no incumbent. Just notice text, again and again.

| Ask a raw-data MCP for NAVSEA's top vendors and you hit all three at once.

SAME QUESTION, DIFFERENT ANSWERS

“Top vendors at NAVSEA, FY2025?”

OPEN-SOURCE MCP #1

Can’t filter below the Navy.
Its keyword workaround
ranks **Serco first, at \$72M.**

OPEN-SOURCE MCP #2

Guesses by contract-number
prefix. Plausible, but **the
same companies appear
twice.**

HITCHAI • OFFICE N00024

Company family	FY2025
General Dynamics	\$23.96B
Huntington Ingalls	\$8.45B

Office total: \$53.4B.

| Free MCPs answer at the department. Hitch answers at the buying office.

Live calls, October 2026, against public USAspending MCP servers and the Hitch MCP.

WHAT DEPTH MEANS

Three levels. Free MCPs never reach the top.

Level 1

Raw

Source fields passed through as-is.

Level 2

Linked

Codes cleaned, records joined.

Level 3

Curated

Company families, office hierarchies, estimates with confidence.

We scored 18 capabilities for Hitch, nine commercial GovCon MCPs and nine free servers. No free server reached level 3 on any. Hitch reached it on company families, agency hierarchy, aggregation, document search, solicitation extraction, budget lines and marks, all checked with live calls.

SIDE BY SIDE

CAPABILITY	FREE WRAPPERS	GOVCON MCPS	HITCHAI
Company families	Parent tree at best	1 of 9	Whole family, in totals
Down to the office	Stops at department	1 of 9	Office codes, both sides
Vehicle families	One contract at a time	3 of 9	Holders, ceiling, buyers
Value estimate	None	3 of 9	Range, basis, confidence
Incumbent contract	None	2 of 9	On record, or predicted
Requirements extracted	None	4 of 9	Clearance, CMMC, CLINs
DoD budget lines	None	0 of 9	All four, to the project
Congressional marks	None	0 of 9	HASC, SASC, House
DoD daily awards	None	0 of 9	By company and date
SAR program data	None	0 of 9	FY 2027 MSARs

GovCon MCPs: how many of nine commercial servers offer what the HitchAI column says, per their published docs. October 2026.

FROM THE LIVE BENCHMARK

Each of these took one call.

LEIDOS

\$12.77B

FY2025, 217
registrations rolled into
one family.

NASA SEWP V

147

holders on one vehicle,
with ceiling and top
buyers (VA \$14.3B).

NAVSEA • N00024

\$53.4B

FY2025 at one office,
top vendors ranked by
family.

AF PE 0604183F

\$806.1M

FY2027 request, every
committee mark, and
the PDF page.

Same Leidos question to two free MCPs: \$10.26B and \$8.69B, the second labeled the wrong year.

Live calls to the Hitch MCP, October 2026.

Follow the dollar from budget to award.

RDT&E, Procurement, O&M,
MILCON lines

Congressional marks

DoD daily contract awards

FY 2027 SARs

No other MCP we tested has any of these four. SAR access depends on plan.

BUILT TO BE TRUSTED

It tells your AI what it doesn't know.

Estimates say so

Every estimated value and award date shows its basis and confidence.

```
basis: "stated"  
confidence: 0.65
```

Absent is not "no"

A missing clearance reads "not stated," so your AI doesn't read silence as a no.

```
absent_means:  
"Absent is NOT no"
```

Dated and sourced

Answers carry their as-of date. Budget figures cite the exhibit page.

```
data_as_of:  
"2026-10-11"
```

HOW IT WORKS

One key. 76 read-only tools.

Budget

DoD justification books, marks, bill status, civilian accounts

Contracts

Vendor, agency and contract pages, pivots, people

Opportunities

Notices, documents, estimates, forecasts

Protests

GAO docket, decisions, statistics

DoD daily awards

DoD daily contract awards, searchable

Programs

FY 2027 Selected Acquisition Reports

Connect from Claude or any MCP client. Read-only by design: your AI can query, never write.

Give your AI the whole market.
